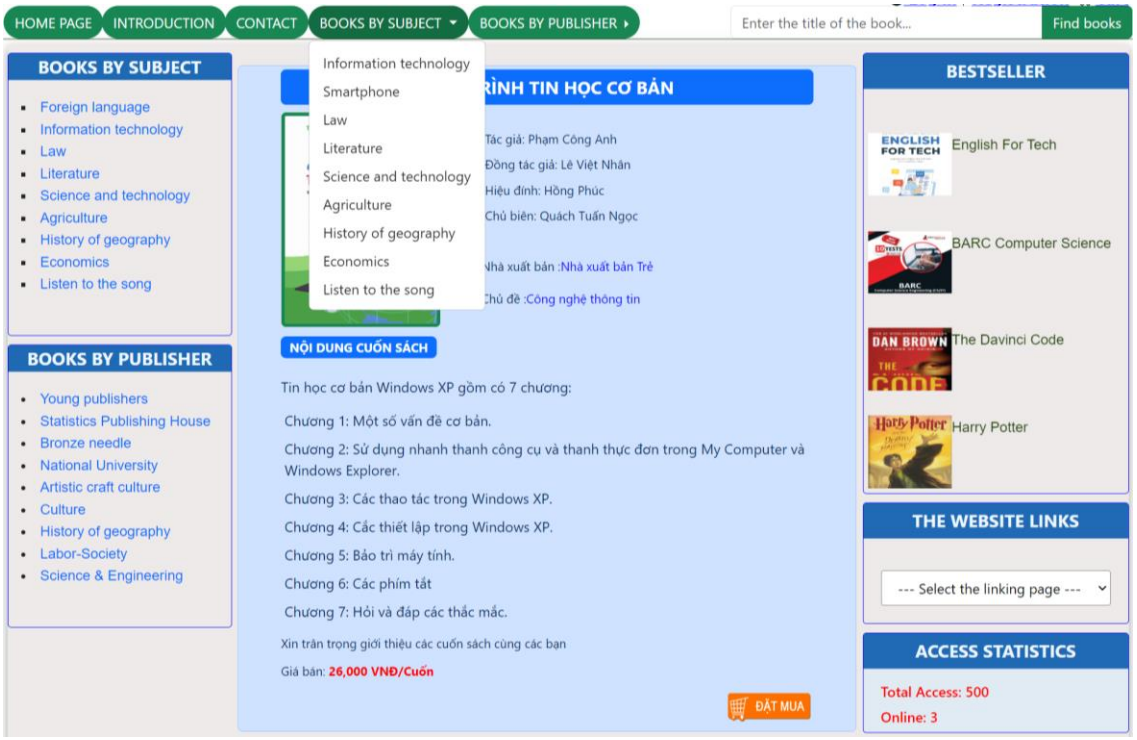
Practice 5

Format the web page with CSS and Bootstrap

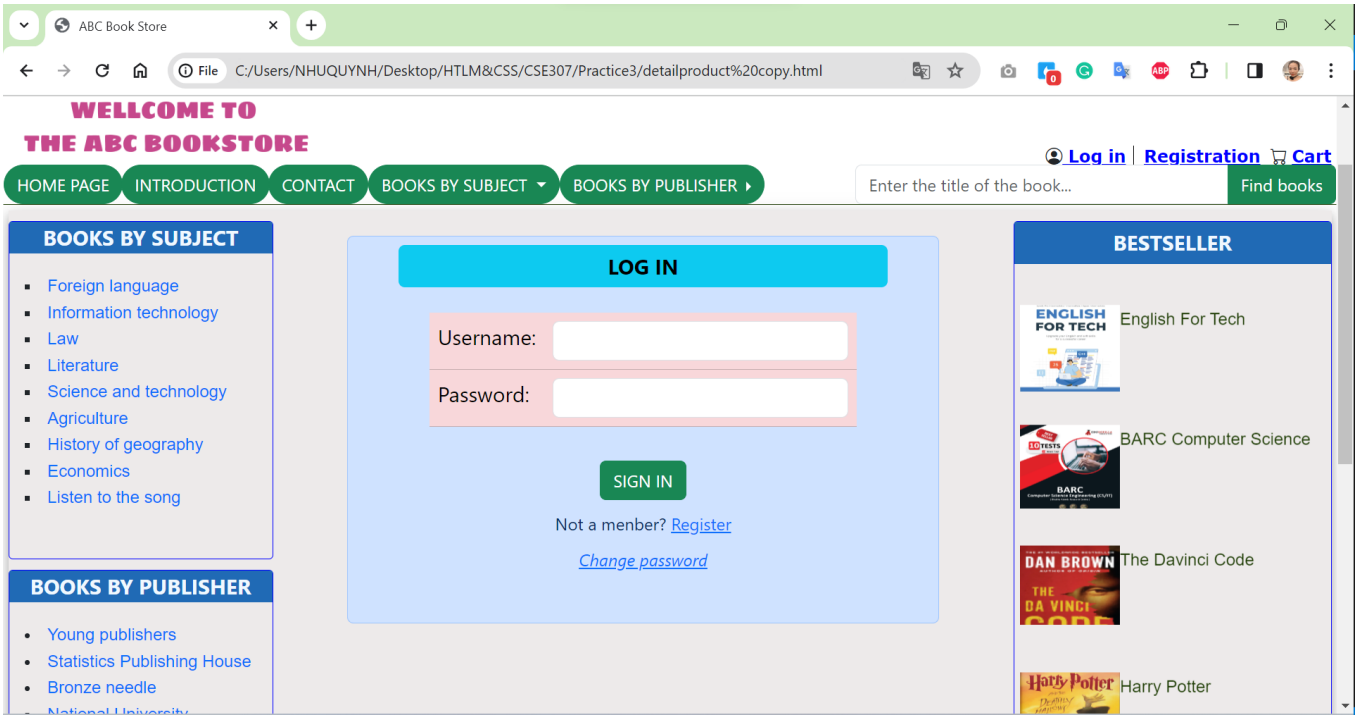
1. Problem 1: Detail Product

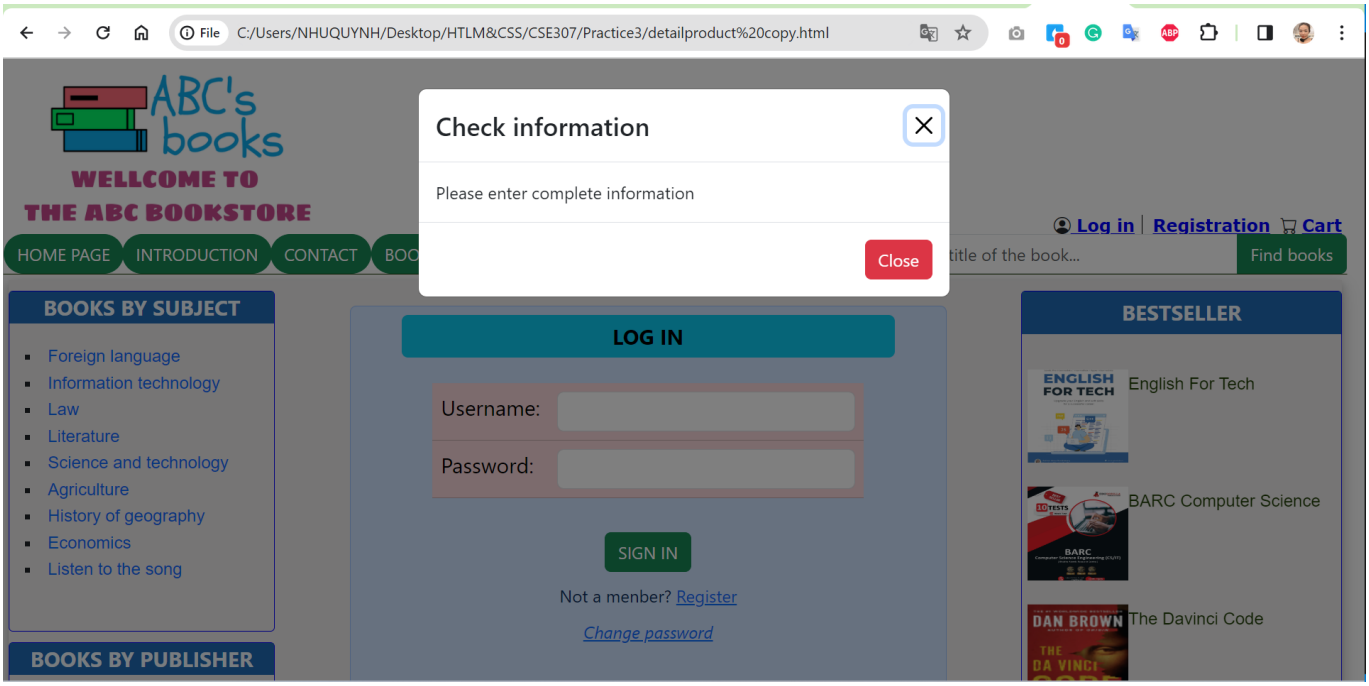
- Using bootstrap combine with CSS to design the page.



2. Problem 2: Log in

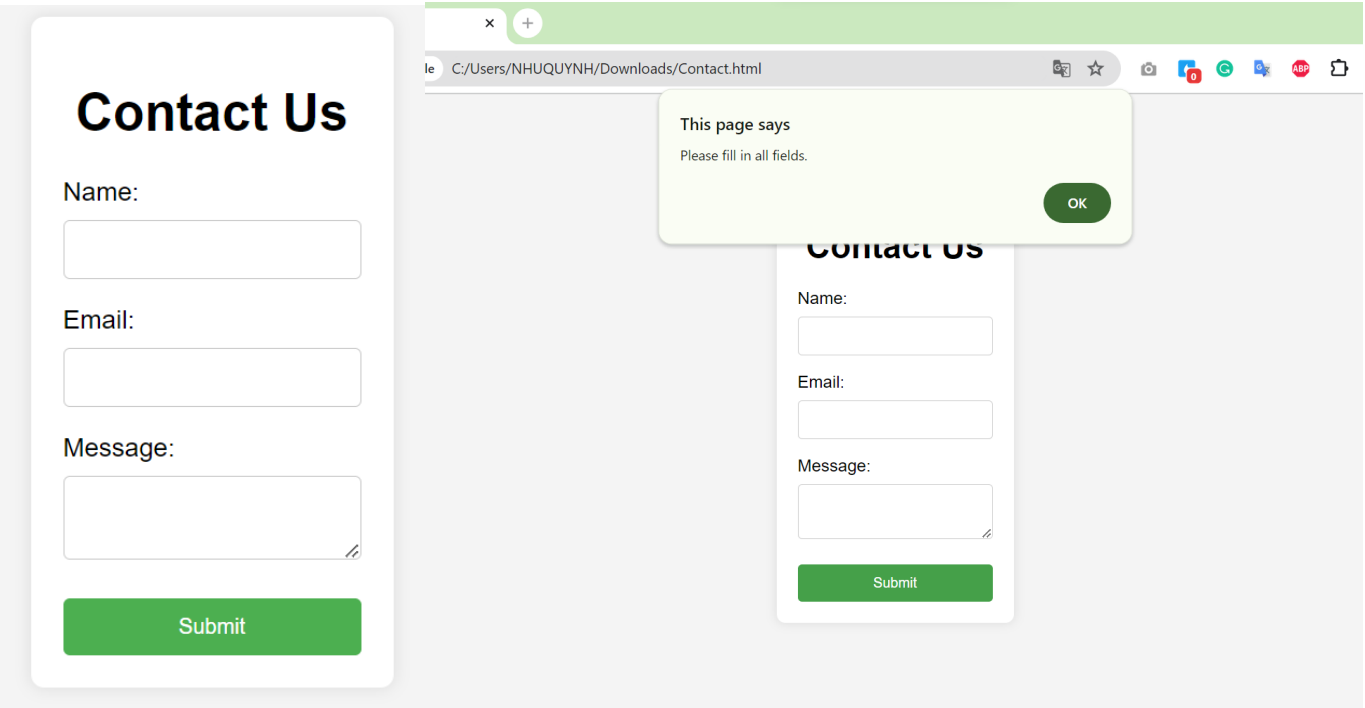
- Using bootstrap combine with CSS to design the page.





3. Problem 3: Contact page

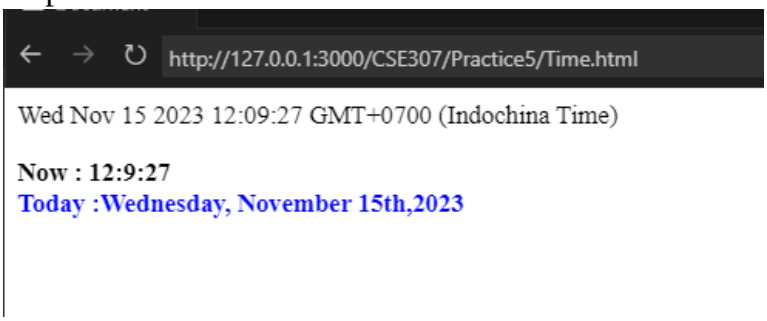
- Using bootstrap combine with CSS and JavaScript to design the page.



Giude code of Javacript:

```
<script>
    function SaveContact() {
        const name = document.getElementById('name').value;
        const email = document.getElementById('email').value;
        const message = document.getElementById('message').value;

        if (!name || !email || !message) {
            alert('Please fill in all fields.');
            return;
        }
        document.getElementById("result").innerHTML= name + "<br>" + email + "<br>" + message
    }
</script>
```

4. Problem 4: Time.html


- Create thime.html page
- Using JavaScript to update real time:
