Format the web page with CSS

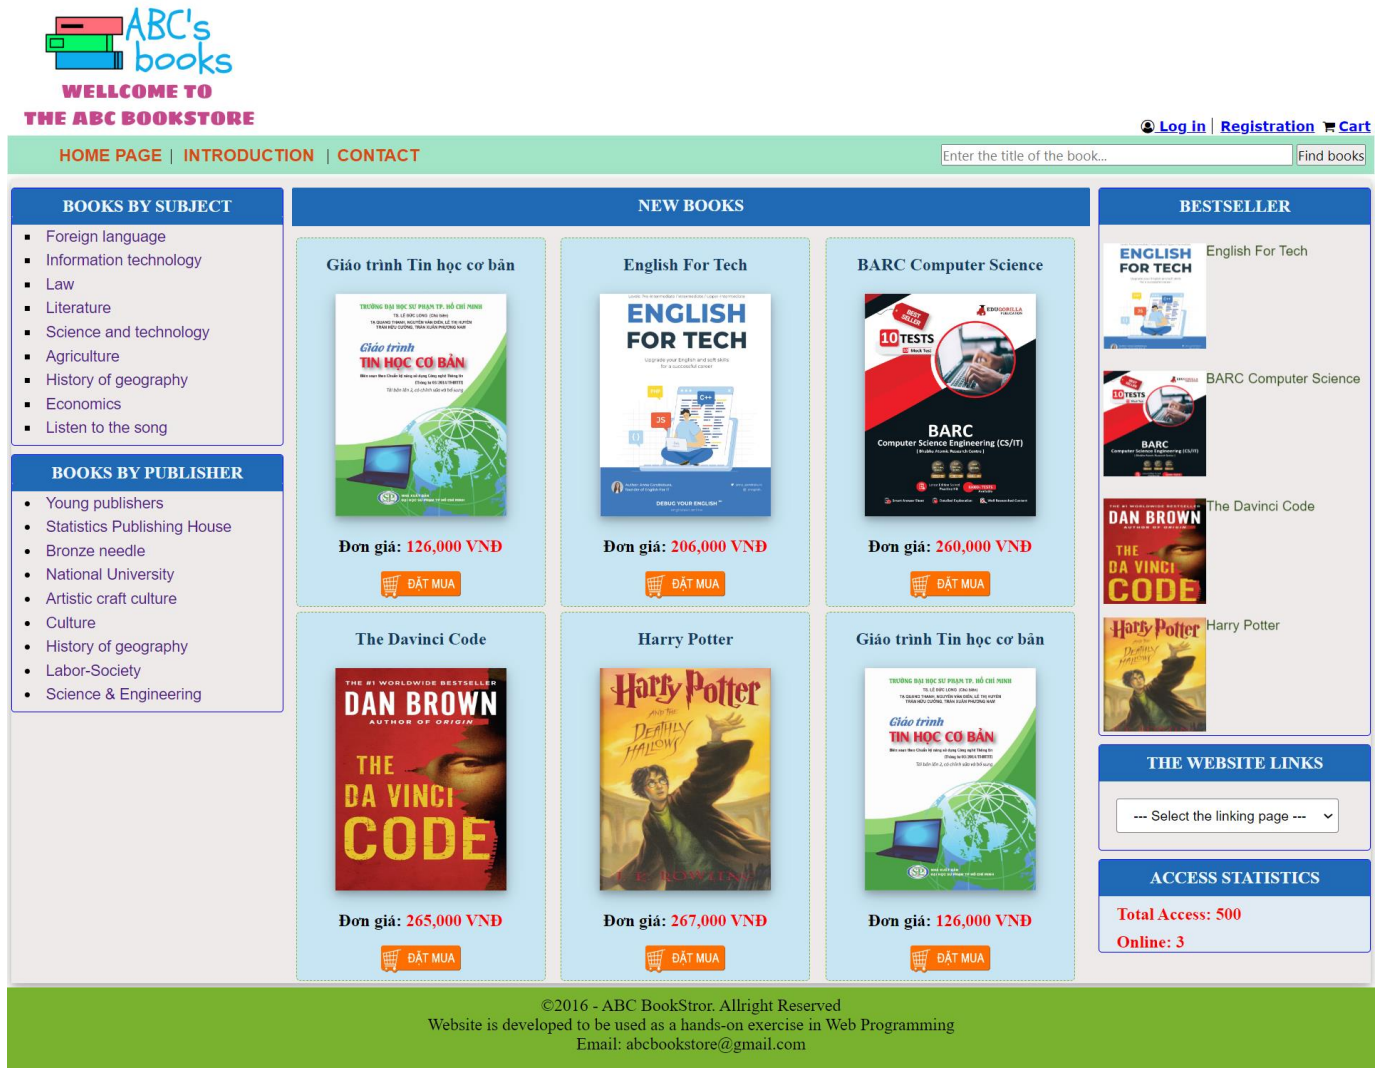

1. Create div tag with id = "body" for article part and format with clear, width, margin, background-color, box-shadow.
2. Format article with the tag: display: table-row;
3. Create id for 2 aside tags: left and right.
4. Note: Using tags used on the before parts for the following parts for general formatting
5. Format divide columns into 3 parts: left and right aside and section

```
aside#left, aside#right, section{
    display: table-cell;
    vertical-align: top;}
aside#left{
    width: 20%;}
aside#right{
    width: 20%;}
```

Problem 1. Format the left aside

1. Create div tag to divide left aside into 2 parts: BOOKS BY SUBJECT and BOOKS BY PUBLISHER
2. Format border for div tag
3. Format p with note: have border-top-left-radius: 2px; border-top-right-radius: 2px,…
4. Format a with :hover : color;

Problem 2. Format the right aside

1. Format border for div tag. Note: have border-radius,…
2. Using div to divide aside#right into 3 parts and create id for it.
3. Note: Use tags already used on the left aside for general formatting, in the BESTSELLER parts, you should many marquee tags for many books.

Problem 3. Format the section body

1. Create class for the div tag (class="product-box") example:

```
<div class="product-box">
  <p class="namebook"> <a href="detailproduct.html">Giáo trình Tin học cơ bản </a></p>
  <img class="photo" src="img_Practice3\Book.png" alt="Informatic-Book" >
  <p class="bill">Đơn giá: <span class="price">126,000 VNĐ</span></p>
  <a href="#"><img src="img_Practice3\Buy.png" class="buttonbuy" alt="Buy-Book"></a>
</div>
```
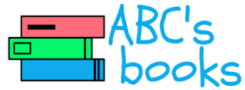

2. Create the div tag for a book.
3. Note: Format order from section p (NEW BOOK) to .product-box then the remaining classes (have .namebook a:hover{font-style:italic;}, .photo:hover{transform: scale(1.1);}.

Problem 4. Format the footer
Note: Format order from footer tag to p tag.

Problem 5. Create the member registration page
